FORM SD
Specialized Disclosure Report

Aerojet Rocketdyne Holdings, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State of Incorporation)

1-01520
(Commission File Number)

34-0244000
(I.R.S. Employer
Identification No.)

222 N. Sepulveda Blvd., Suite 500
El Segundo, California
(Address of Principal Executive Offices)

90245
(Zip Code)

Paul R. Lundstrom, Vice President and Chief Financial Officer
(310) 252-8100

(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2017.

Section 1 Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

This Form SD and the Conflict Minerals Report attached hereto as Exhibit 1.01 of Aerojet Rocketdyne Holdings, Inc. (the "Company") are filed pursuant to Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended, for the reporting period January 1 to December 31, 2017.

A copy of the Company's Conflict Minerals Report is provided as Exhibit 1.01 hereto and is publicly available at <http://ir.aerocketdyne.com/sec.cfm>.

Item 1.02 Exhibit

As specified in Section 2, Item 2.01 of this Form SD, the Company is hereby filing its Conflict Minerals Report as Exhibit 1.01 to this report.

Section 2 Exhibits

Item 2.01 Exhibits

The following exhibit is filed as part of this report.

Exhibit No.	Description
1.01	Conflict Minerals Report of Aerojet Rocketdyne Holdings, Inc. as required by Items 1.01 and 1.02 of this report.

Forward Looking Statements

Unless otherwise indicated or required by the context the terms "we," "our," and "us" refer to Aerojet Rocketdyne Holdings, Inc.

This report and any exhibits to this report may contain "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995 regarding our business, products and conflict minerals efforts, including steps we intend to take to mitigate the risk that conflict minerals in our products benefit armed groups in the Democratic Republic of Congo or an adjoining country. The words "anticipate," "believe," "estimate," "expect," "intend," "will," "should" and similar expressions, as they relate to us, are intended to identify forward-looking statements, but are not the exclusive means of identifying forward-looking statements in this report. Additionally, statements concerning future matters that are not historical are forward-looking statements. Although forward-looking statements in this report reflect our good faith judgment, such statements can only be based on facts and factors currently known to us. Consequently, forward-looking statements are inherently subject to risk and uncertainties, and actual results and outcomes may differ materially from the results and outcomes discussed in or anticipated by forward-looking statements. Factors that could cause or contribute to such differences in results or outcomes include without limitation: the risk that information reported to us by our suppliers from which we directly procure finished goods, components, materials and/or services for our products (direct suppliers), or industry information used by us, may be inaccurate; the risk that smelters or refiners (processing facilities) may not participate in the Responsible Minerals Assurance Process, which is a voluntary initiative in which independent third parties audit processing facilities' procurement and processing activities and determine if the processing facilities maintain sufficient documentation to reasonably demonstrate conflict-free sourcing; as well as risks discussed under the heading "Risk Factors" in our most recent Annual Report on Form 10-K filed with the Securities and Exchange Commission as well as in our Current Reports on Form 8-K. Readers are urged not to place undue reliance on forward-looking statements, which speak only as of the date of this report. We undertake no obligation to revise or update any forward-looking statements in order to reflect any event or circumstance that may arise after the date of this report. Throughout this report, whenever a reference is made to our website, such reference does not incorporate information from the website by reference into this report unless specifically identified as such.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Aerojet Rocketdyne Holdings, Inc.

Date: May 29, 2018

By: /s/ Arjun L. Kampani

Name: Arjun L. Kampani

Title: Vice President, General Counsel and Secretary

EXHIBIT INDEX

Exhibit No.	Description
<u>1.01*</u>	<u>Conflict Minerals Report of Aerojet Rocketdyne Holdings, Inc. as required by Items 1.01 and 1.02 of this report.</u>

* Filed herewith

Aerojet Rocketdyne Holdings, Inc.
Conflict Minerals Report
For the Year Ended December 31, 2017

Unless otherwise indicated or required by the context the terms "we," "our," "us," and "the Company" refer to Aerojet Rocketdyne Holdings, Inc.

This report for the year ended December 31, 2017, is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (the "Rule"). The Rule was adopted by the Securities and Exchange Commission ("SEC") to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule imposes certain reporting obligations on SEC registrants whose manufactured products contain conflict minerals which are necessary to the functionality or production of their products. Conflict Minerals are defined as cassiterite, columbite-tantalite, gold, wolframite and their derivatives, which are limited to tin, tantalum, and tungsten. These requirements apply to registrants whatever the geographic origin of the conflict minerals and whether or not they fund armed conflict.

1. Pursuant to the Rule, this report is not subject to an independent private sector audit.

Company Overview

Aerojet Rocketdyne Holdings, Inc. is a manufacturer of aerospace and defense products and systems with a real estate segment. The Company's operations are organized into two segments:

Aerospace and Defense — includes the operations of the Company's wholly-owned subsidiary Aerojet Rocketdyne, Inc. ("Aerojet Rocketdyne"), a leading technology-based designer, developer and manufacturer of aerospace and defense products and systems for the United States government, including the Department of Defense, the National Aeronautics and Space Administration, and major aerospace and defense prime contractors. It is possible that Aerojet Rocketdyne business activities may result in the use of conflict minerals (as defined in Section 1, Item 1.01 (d)(3) of Form SD) that originated in the Democratic Republic of the Congo ("DRC") or an adjoining country (collectively, referred to as the "Covered Countries") or are from recycled or scrap sources (as defined in Section 1, Item 1.01 (d)(6) of Form SD) in the production of its products.

Real Estate - includes the activities of the Company's wholly-owned subsidiary Easton Development Company, LLC related to the re-zoning, entitlement, sale, and leasing of the Company's excess real estate assets. The Company's real estate activities do not result in the use of conflict minerals in any form.

The content of any website referred to in this Conflict Minerals Report is included for general information only and not incorporated by reference in this report.

Supply Chain

We rely on our direct suppliers to provide information on the origin of tin, tantalum, tungsten, and gold ("3TG") contained in components and materials supplied to us, including sources of 3TG that are supplied to them from lower tier suppliers.

The Company included suppliers in our 3TG due diligence that were determined to directly support the Company's products. We provided Source Intelligence ("SI") a list of Tier 1 suppliers determined to be in-scope for regulatory purposes based on our influence over the manufacturing process and potential use of 3TG. We assessed our industry as well as others and confirmed that this risk-based approach is consistent with how many of our peer companies are approaching the Rule. Because of our size, the complexity of our products, and the depth, breadth, and constant evolution of our supply chain, it is difficult to identify suppliers downstream from our direct suppliers.

In accordance with the Organisation for Economic Co-operation and Development ("OECD") Guidance and the Rule, this report is available on our website at <http://ir.aerojetrocketdyne.com/sec.cfm>.

Conflict Minerals Policy

Aerojet Rocketdyne's conflict minerals policy can be found at the following internet website at <http://www.rocket.com/supp/policies>.

2. Due Diligence Process

2.1 Design of Due Diligence

Our due diligence measures have been designed to conform, in all material respects, with the framework in The OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas Second Edition 2013 (“OECD Guidance”) and the related Supplements for 3TG.

2.2 Management Systems

As described above, Aerojet Rocketdyne has adopted a policy which is posted on our website at <http://www.rocket.com/supp/policies>.

Internal Team

The Company has established a compliance and management reporting system for conflict minerals. Our management system is sponsored by the Vice President, Supply Chain & Materiel Management, as well as a team of subject matter experts from relevant functions in Supply Chain Management. The team of subject matter experts is responsible for implementing our conflict minerals compliance strategy and is led by the Director, Supply Chain Compliance who acts as the conflict minerals program manager.

Control Systems

As the Company does not typically have a direct relationship with 3TG smelters and refiners, we are engaged and actively cooperate with other major manufacturers in the Aerospace and Defense Industry. The Company implemented a supply chain system of controls and transparency through the use of due diligence tools created by the Conflict-Free Sourcing Initiative (“CFSI”), which includes the Conflict Minerals Reporting Template (“CMRT”), a supply chain survey designed to identify the smelters and refiners that process the necessary conflict minerals contained in our products. Additionally, the Company contracted with SI which delivers supply chain intelligence and supplier data collection and analysis services that support regulatory compliance, sustainability and social responsibility initiatives. SI was utilized extensively to gather 3TG supplier data for the Company.

Controls include, but are not limited to, our Code of Conduct which outlines expected behaviors for all of our employees, our Suppliers Code of Conduct, and a supplier conflict minerals contract clause incorporated in all purchase order/subcontracts.

2.3 Reasonable Country Of Origin Inquiry (“RCOI”)

The Company’s RCOI employed a combination of measures to determine whether the necessary conflict minerals in the Company's products originated from the Covered Countries or are from recycled or scrap sources. The Company’s primary means of determining country of origin of necessary conflict minerals was conducting a supply chain survey with direct suppliers using the Electronic Industry Citizenship Coalition Global e-Sustainability Initiative (“EICC-GeSI”) Conflict Minerals Reporting Template, which we refer to as the EICC-GeSI form.

To complete the RCOI required by the Rule, SI engaged the Company’s suppliers to collect information about the presence and sourcing of 3TG used in the products and components supplied to the Company. The SI program utilized the Conflict-Free Sourcing Initiative’s CMRT. Suppliers were offered two options to submit the required information, either by uploading the CMRT or by completing an online survey version of this template directly in the SI platform. In certain cases if a supplier was unable to complete on the platform, the Company or SI uploaded the CMRT on their behalf.

2.4 Supplier Engagement

The Company provided SI with at least one method of contact for each Tier 1 supplier designated as in-scope (email address and telephone number). Email was the preferred method of communication. The RCOI began with an introduction email from Aerojet Rocketdyne to suppliers describing the Conflict Minerals Compliance Program (“CMCP”) requirements and identifying SI as a partner in the process. Following that introduction email, SI sent a subsequent email to suppliers containing a registration and survey request link for the on-line data collection platform.

In an effort to increase awareness of the CMCP, supporting regulation, and frequently asked questions concerning 3TG mineral tracing, our suppliers were directed to the SI Conflict Minerals Supplier Resource Center (<https://conflictmineralsresources.com>) in the initial registration email.

Suppliers were asked to provide information regarding the sourcing of their materials with the ultimate goal of identifying the 3TG smelters or refiners ("SORs") and associated mine countries of origin. Suppliers who had already performed a RCOI through the use of the CMRT were asked to upload this document into the SI system or to provide this information in the online survey version.

Where a supplier was unable to provide a CMRT, SI requested information on its suppliers of products or components which may require 3TG for their production or functionality. These Tier 2 suppliers, and subsequent tiers of suppliers as needed, were then engaged following the contact procedures explained above. When contact information was provided, Tier 2 and beyond suppliers were contacted up to two times via email or phone in order to build a chain-of-custody back to the 3TG SOR. Every effort was made to address and meet the concerns of suppliers regarding their need to maintain the confidentiality of their data. In order to address this concern, SI executed non-disclosure agreements with the Company's suppliers when requested.

Suppliers were requested to provide an electronic signature before submitting their data to the Company to verify that all answers submitted were accurate to the best of the supplier's knowledge but the suppliers were not required to provide an electronic signature to submit their data.

2.5 RCOI Results

As a downstream purchaser of potential conflict minerals, our due diligence measures can provide only reasonable, not absolute, assurance regarding the source and chain of custody of the necessary conflict minerals. Our due diligence processes are based on the necessity of seeking data from our direct suppliers and those suppliers seeking similar information within their supply chains to identify the original sources of the necessary conflict minerals or whether the necessary conflict minerals were from recycled or scrap sources. We also rely, to a large extent, on information collected and provided by independent third party audit programs. Such sources of information may yield inaccurate or incomplete information and may be subject to fraud.

Another complicating factor is the unavailability of country of origin and chain of custody information from our suppliers on a continuous, real-time basis. Since we do not have direct contractual relationships with SORs, we rely on our direct suppliers to gather and provide specific information about the date when the ore is smelted into a derivative and later shipped, stored, sold and first entered the stream of commerce.

A total of 779 Tier 1 suppliers were identified as in-scope for conflict mineral regulatory purposes and contacted as part of the RCOI process conducted by SI. The response rate among these suppliers was 61%. Of these responding suppliers, 34% indicated one or more of the 3TG metals as necessary to the functionality or production of the products they supply to us. A total of six Tier 2+ suppliers were identified as in scope for conflict minerals and contacted. The response rate among these suppliers was 100%. Based on SI SOR database there was an indication of DRC sourcing for 59 out of 304 verified SORs.

Based on the information provided by our suppliers, the facilities that may have been used to process the necessary conflict minerals used in the products described above may include the SORs listed in Appendix A.

2.6 Due Diligence Process

For those supply chains with SORs that are known or thought to be sourcing from the DRC, additional investigation is needed to determine the source and chain-of-custody of the regulated metals. SI relies on the following internationally accepted audit standards to determine which SORs are considered "DRC Conflict Free": the Responsible Minerals Assurance Process, the London Bullion Market Association Good Delivery Program and the Responsible Jewellery Council Chain-of-Custody Certification. SI has become an official vendor member of the Responsible Minerals Initiative ("RMI") to further facilitate the exchange of supply chain data and technical information in the quest for global ethical sourcing of materials. This membership provides SI access to the following working groups: Engage with the CMRT Development Team, Smelter Engagement Team, Smelter Data Management Team, RMI Stakeholders Call, and RMI Plenary.

If the SOR is not certified by these internationally-recognized schemes, SI attempts to contact the SOR to gain more information about their sourcing practices, including countries of origin and transfer, and whether there are any internal due diligence procedures in place or other processes the SOR takes to track the chain-of-custody on the source of its mineral ores.

Relevant information to review includes: whether the SOR has a documented, effective and communicated conflict-free policy, an accounting system to support a mass balance of materials processed, and traceability documentation. Internet research is also performed to determine whether there are any outside sources of information regarding the SOR's sourcing practices. Up to three contact attempts are made by SI to SORs to gather information on mine country of origin and sourcing practices.

3. Steps To Be Taken To Mitigate Risk Through Enhanced Due Diligence Efforts

The Company intends to take the following steps to improve the due diligence conducted to further mitigate any risk that the necessary conflict minerals in its products could benefit armed groups in the Covered Countries:

- Continue to include a conflict minerals flow-down clause in new or renewed supplier contracts.
 - Continue engagement with suppliers and direct them to training resources to increase the response rate and improve the content of the supplier survey responses.
 - Define and improve best practices and build leverage over its supply chain in accordance with the OECD Guidance.
-

Appendix A

The table below lists the validated smelters identified in our EICC-GeSI Template responses for 2017.
